Starting on June 1st you will now be able to access your SciFinder account via SSO Federated connection:

Screen Captures of the Initial log in:

New user will see one time prompt to verify information:

Let's confirm your identity.

Your institution provided us with some of your information.
We need to verify that information to help you access
CAS products going forward.

Prefix (Optional)

Dr.

First Name

Ima

Last Name

Khemest

Institution

Idp.company.com

Institution Location

Select

Existing user will be prompted to link to their current ID:

Here is the Account we matched you to.

We were able to match an existing CAS Account with your
information. We will now link your Institutional information with
your CAS Account.

Your Name
user@domain.com

Institution   Username
Your Organization   CURRENT ID

Link Accounts

Not you?

After clicking Link Accounts or verifying information you will see this:
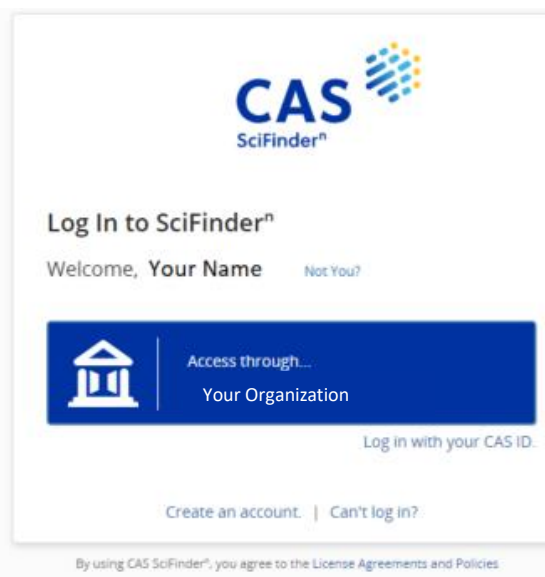

Thanks!

You have successfully verified your login information. Going forward, you will access CAS products via your company's own portal or intranet. You can view and change your credentials in CAS Profile.

Your Name
user@domain.com

Log In

Click "Log In" to launch SciFinder^n or other CAS application

When you go to the base URL such as https://scifinder-n.cas.org or you log out you will now see this:

CAS
SciFinder^n

Log In to SciFinder^n
Welcome, **Your Name**   Not You?

Access through...
Your Organization

Log in with your CAS ID.

Create an account. | Can't log in?

By using CAS SciFinder®, you agree to the License Agreements and Policies

Click the blue access through box in order to log in

What is SSO Federated Access?

- It is a secure login method that removes the need to remember and enter usernames and passwords, but still identifies individual users so that you can use features such as alerts and saved searches.

Do I use the same URL as before to access SciFinder^n?

- The ideal way to access for users will be to use the new URL for direct access without a sign in page https://sso.cas.org/sp/startSSO.ping?PartnerIdpId=https%3A%2F%2Fidp.tu-clausthal.de%2Fidp%2Fshibboleth&TargetResource=https%3A%2F%2Fscifinder-n.cas.org%2F

Can I still use the previous URL (https://scifinder-n.cas.org/)?

- After we "go live" any users that go to the previous URL will be presented with the 'Access through...' screen after entering their Username or email (instead of being prompted for the CAS password) where they will click to access through TU Clausthal.
